RESOLUTION

Market Drive, Consumer Choice Garbage Collection Services

The Lakeville Chamber of Commerce is committed to promoting and developing a strong and competitive business community, and

Whereas, the Chamber supports businesses who are invested in the communities they serve and create quality jobs with quality wages, and

Whereas, part of the mission and vision of the Chamber includes advocating on behalf of our members on issues that affect them, and

Whereas, efforts to create single hauler government collection monopolies restrict consumer choice and prevent consumers from shopping for value, and

Whereas, competitive markets allow for customers to select service options that best fit their needs, and promote the acceleration of innovation in the marketplace, now

Therefore, be it resolved that the Lakeville Chamber of Commerce Board of Directors supports market driven, consumer choice garbage collection services and believe it to be healthy for both the consumer and the business community alike.
